3. Copying the file

Code:

The screenshot shows an IDE with the following components:

- Project Explorer (Left):** Lists files in the project, including `CopyFile.java`.
- Code Editor (Center):** Displays the code for `CopyFile.java`. The code reads a file `source.txt` and writes its contents to `target.txt`.

```

1  class CopyFile {
2      static void main(String[] args) {
3          BufferedWriter bw = new BufferedWriter(new FileWriter("target.txt"));
4
5          String line;
6
7          while ((line = br.readLine()) != null) {
8              bw.write(line);
9              bw.newLine();
10         }
11
12         br.close();
13         bw.close();
14
15         System.out.println("File copied successfully.");
16     } catch (IOException e) {
17         System.out.println("Error occurred.");
18     }
19 }
20
21
22

```
- Run Console (Bottom):** Shows the command to run the application and the output.

```

C:\Program Files\Java\jdk-9.0.4\bin\java.exe -jar C:\Users\user\AppData\Local\Temp\144334A-2-555A\temp_exe_dir\99350\CopyFile\CopyFile.jar
File copied successfully.
Process finished with exit code 0

```

Output:
